

Skills	Senior Data Scientist
Years of Experience	5-7 years' Experience
Location	Bangalore(Willing to Travel)
Job Overview	<p>We are looking for a Data Scientist who will work with our clients in the Consumer Products and Goods space and Internal teams to help them with insights gained from analyzing company data on solutions which are built by us. The ideal candidate is adept at using large data sets to find opportunities for product and process optimization and using models to test the effectiveness of different courses of action. They must have strong experience using a variety of data mining/data analysis methods, using a variety of data tools, building and implementing models, using/creating algorithms and creating/running simulations. They must have a proven ability to drive business results with their data-based insights. They must be comfortable working with a wide range of stakeholders and functional teams. The right candidate will have a passion for discovering solutions hidden in large data sets and working with stakeholders to improve business outcomes.</p>
Qualification	<ul style="list-style-type: none"> • Strong problem-solving skills with an emphasis on product development. • Experience using statistical computer languages (R, Python, SLQ, etc.) to manipulate data and draw insights from large data sets. • Experience working with and creating data architectures. • Knowledge of a variety of machine learning techniques (Linear and Non-Linear programming, clustering, decision tree learning, artificial neural networks, etc.) and their real-world advantages/drawbacks. • Knowledge of advanced statistical techniques and concepts (regression, properties of distributions, statistical tests and proper usage, etc.) and experience with applications. • Excellent written and verbal communication skills for coordinating across teams. • A drive to learn and master new technologies and techniques. • We're looking for someone with 5-7 years of experience manipulating data sets and building statistical models, has a Master's or PHD in Statistics, Mathematics, Computer Science or another quantitative field, and is familiar with the following software/tools: • Good exposure to CPG industry in areas of Revenue Management (Promotion Optimization), Sales and Marketing areas. • Coding knowledge and experience with several languages: Python, R, SQL

	<ul style="list-style-type: none">• Knowledge and experience in statistical and data mining techniques: GLM/Regression, Random Forest, Boosting, Trees, text mining, social network analysis, etc.• Experience with distributed data/computing tools: Map/Reduce, Hadoop, Hive, Spark, Gurobi, MySQL, etc.• Experience visualizing/presenting data for stakeholders using Visualization tools like Power BI, Tableau, Qlik, D3 etc.
Technical Skills	<ul style="list-style-type: none">• Work with stakeholders throughout the organization to engineer solutions for Predictive and Prescriptive Analytics including Optimization.• Good knowledge on Optimization algorithms (Linear Optimization and Non-Linear Optimization)• Work with clients to identify opportunities for leveraging company data to drive business benefits.• Assess the effectiveness and accuracy of new data sources and data gathering techniques.• Develop custom data models and algorithms to apply to data sets.• Use predictive modeling to increase and optimize customer experiences, revenue generation, ad targeting and other business outcomes.• Develop company A/B testing framework and test model quality.• Coordinate with different functional teams to implement models and monitor outcomes.• Develop processes and tools to monitor and analyze model performance and data accuracy.
